

Mi12

PRESENTATION

The Mi12 model gives you the possibility to connect up to 12 channels and features a complete set of functions

FEATURES

The new Mi Series has been created by PROEL in order to offer very compact mixers with a high input density at a very affordable price.

The series includes 3 models with 6, 10 and 12 channels, featuring in a very compact package a high number of inputs and a full set of intelligent features, able to satisfy most of the sound reinforcement applications.

Mi12 features one of the finest digital effects of its class, the PROEL 24bit PROFEX DSP, including 256 state-of-the-art presets and a convenient LCD display. It delivers a clean and accurate sound and full mixing capability in a stylish and unconventional case.

- Ultra-compact 12-channel 2-bus mixer
- 4 MIC/LINE inputs with 3-band EQ, LO-CUT and PHANTOM power
- Low-noise, very high-headroom microphone preamplifiers
- 4 STEREO LINE inputs with balance control, monitor and effect send
- 2 AUX sends
- 2-TRACK, HEADPHONES and CONTROL ROOM outputs

- 24bit PROFEX DSP with 256 presets, TAP delay and 2-digit display
- Electronically balanced MAIN MIX outputs with 45mm fader
- Two 4-LED VU-METERS
- Stage-proof construction and ultra-rugged metal chassis
- Designed and engineered in Italy by PROEL
- Applications: small live bands (3 to 5 people), home and multimedia applications, rehearsal rooms, small fixed installations
